

**Specification:
Documentation for a lighting management system**

Documentation:

Production of transfer documents, production of documentation for the DALI / IP network, with product description, updated functional description, drawings for localising the DALI users and data sheets

List of the project-specific settings made during the set-up phase (configuration parameters, time entries)

Controls and communication interfaces

The documents must be presented at the time of acceptance, single copies, in the correct order and in folders, also as electronic files on data media.
