

Specification for sensor Daylight

- Light sensor for detecting the amount of daylight entering through windows
- Surface-mounted ceiling sensor, connected with screw terminals
- Slide switch for adjusting the sensitivity (0 to 1000/5000 lux)
- Connection for two-wire cable to daylight-dependent control units with standardised 4–20 mA interfaces
- Permissible ambient temperature 0–50°C
- Casing material made of flame-resistant polycarbonate; halogen-free
- Type of protection IP20
- Dimensions: diameter 80 mm, height 25 mm
- Shatter-proof
